

----If your box does not work at all;
----If your box runs very slowly and always stuck;
----If your box reboot loop on the animated logo all the time and can't enter the system;
----If you want to reset your box factory.
Enter the recovery interface to clean the data of your box by reset button()

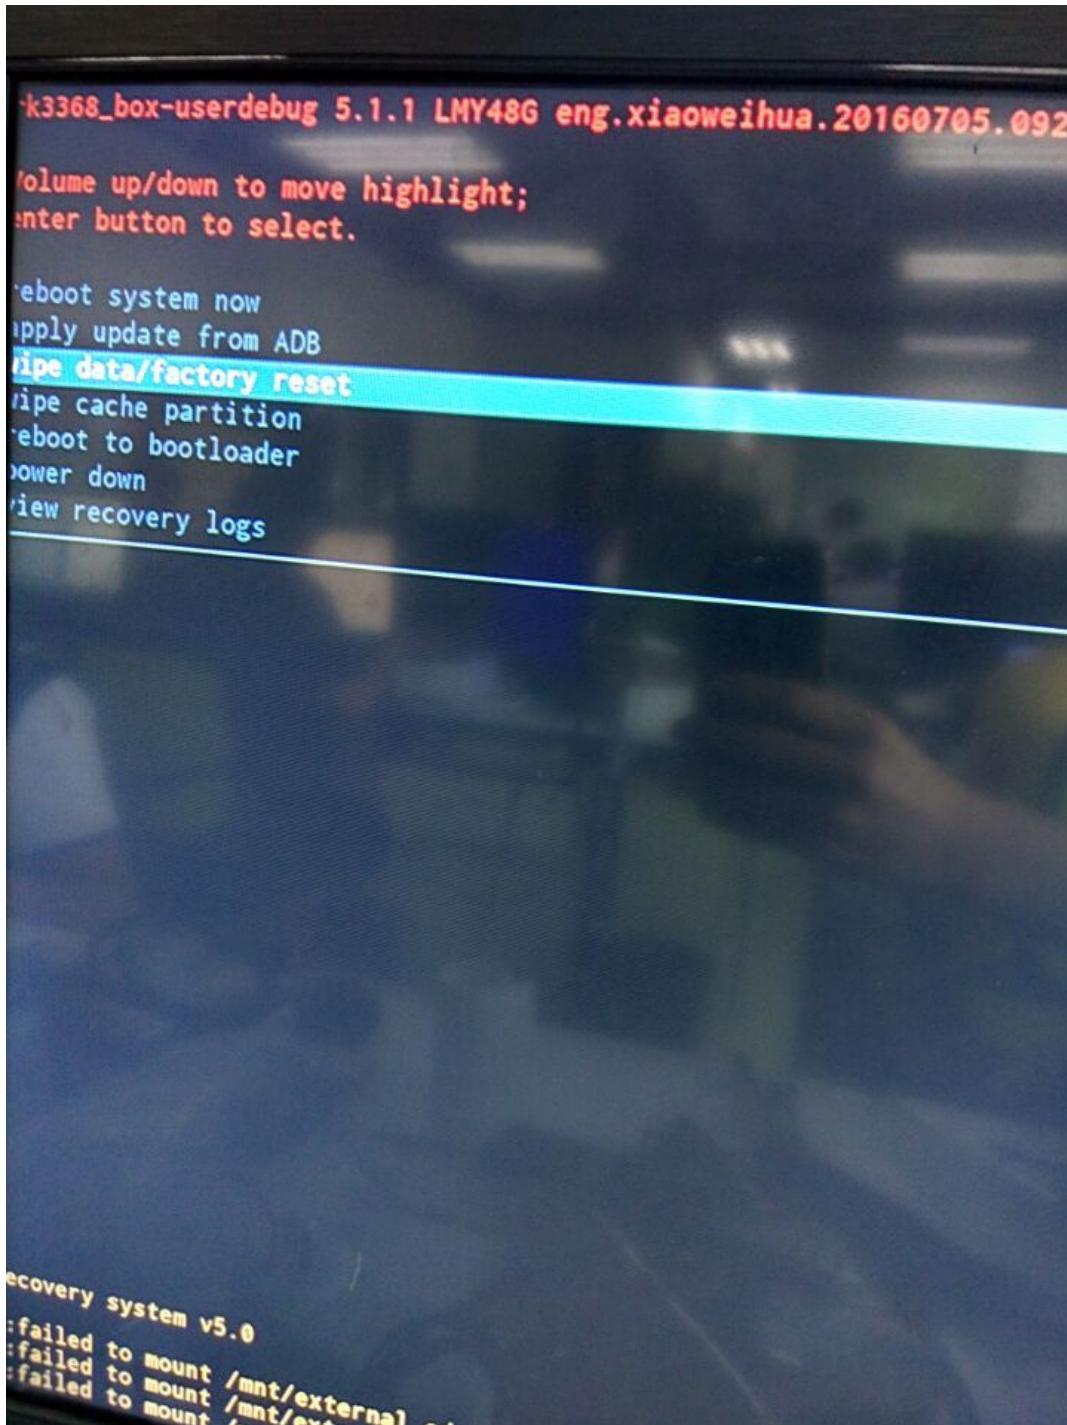

ZIDOO_X6 Pro:

ZIDOO_X1

Press the reset key on the box then plug on the power. wait about 15sec, unloosen the reset button. and it will enter the recovery interface.

find the "data/factory reset",click it, when it completed.
reboot your box.just wait for about 5 minute. you can enter the system
of your box again.
